## Fire Extinguishers

The type of fire extinguishers we supply are manufactured to the highest standard in the UK and are approved to BS EN3.

All types fire extinguishers are designed to be user friendly as well as effective, including squeeze grip operation, controllable discharge, colour coded block to help operators identify the fire extinguisher type, clear screen printed instructions.

## Supply and Survey

We can supply all types of extinguisher and all our new extinguisher come Commissioned Serviced by a competent person as required by BS5306 part 3. They will also be wall mounted with the correct bracket within this price.

We can carryout complete surveys to new and existing site to ensure your premises is compliant with legislation.

## Extinguisher checklist

Below is a checklist of what you should know about the fire extinguishers on your premises:

- Do you have enough Class A rated extinguishers to meet Fire Regulations and remain insured?
- Have you identified and provided adequate fire protection for specific fire risks e.g. electrical equipment, hazardous materials, heat processes etc?
- Are your extinguishers serviced annually by a competent person?
- Have you nominated a Responsible Person within your organisation to conduct weekly visual inspections of extinguishers and record the results in a Fire Log book?

**If you can't answer these questions then your premises may not comply with current legislation and your insurance could be compromised!**

**Please contact us for more information.**

## Servicing and Maintenance

Regular maintenance is essential with fire extinguishers. British Standard Code of Practice BS 5306 Part 3 recommends that your fire extinguishers are serviced at least annually to ensure that they will always function in an emergency. The range of fire extinguishers we supply will provide many years of reliable fire protection if properly maintained and regularly serviced by a competent engineer. Our engineers will visit on an annual basis to ensure your equipment is kept ready for the moment you really need it and are happy to advise you on any of your fire safety queries.

## Benefits of our service

- All our engineers are FETA qualified.
- Our engineers work on a none commission based salary, so they only recommend work/equipment for the right reasons.
- We are an independant company so we are not tied to one supplier, this means we can offer our customers more competative prices.
- In compliance with BS 5306 Part 3 we replace all seals each time a part is removed during service.
- We operate a callout services to refill used fire extinguishers or repair faulty equipment.
- Our engineers carry an extensive stock of etinguishers and other fire safety equipment so work can be completed no the same day in most cases.

## Extinguisher Hire

We offer an extinguisher hire service to provide cover for events within the local area these include:

- Concerts
- Car rallies
- Corporate Functions

Equipment will be delivered and collected from the sites at the convenience of the organisers.
